

MURC 4402

Anti Scaling Chemical For Cooling Tower

Description & MURC 4402

To ensure open and closed cooling systems well maintained and operated at optimum efficiency it is essential that the correct water conditions are maintained at all times. Cooling tower and its circuit of equipment should be scale free. This can be achieved by using carefully our MURC 4402 scale inhibitor designed specifically for cooling systems. Clean Chem's water scale inhibitor has been scientifically formulated to protect cooling systems from the effects of scale build-up. Our scale inhibitors deliver improved performance, helping to reduce maintenance costs, improve reliability and optimize operational efficiency.

A Scaled Tube

Product Benefits

- High performance aqueous blend of scale inhibitors designed for use in cooling water circuits.
- Excellent scale inhibition.
- Additional corrosion inhibition properties.
- Compatible with all other chemicals commonly used in water treatment.
- Halogen resistant.
- Can be dosed directly from the drum for ease of dosing and handling.
- High calcium tolerance.

Characteristics

Appearance	: Liquid
Colour	: White/Pale Yellow
Water Solubility	: Miscible
pH	: 2 to 4
Specific gravity	: 1.01 to 1.13

Before Treatment After Treatment with MURC 4402

Application

Dosage levels will be dependent upon water quality, system conditions and operational factors. The correct level for your system will be advised by your technical consultant. However, generally, 150-200 ppm dosage may be. The product can be dosed direct from the drum or pre diluted in a dosing tank and is to be dosed at the lift/inlet of pump.

Availability

MURC 4402 is available in various grades for multiple applications. Custom made MURC 4402 is also available to suit for a specific utility.

Safety & Handling

MURC 4402 safe but avoid contact with eyes and skin. Do not take internally. Gloves and goggles should be used while handling the product.

Information in this publication, are given to the best of our knowledge, and may be amended without notice.
